Ms. Henney:

As a member of the Center for Science in the Public Interest(CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Let's make 'preservative free', 'organically grown', and 'all natural', more than just slogans! My grandfather, a midwest farmer, warned years ago of the move away from some time honored methods of crop cultivation and livestock feeding. He didn't need a PhD to recognize the inherent dangers. His was an eight grade level education before the turn of the century, but years of experience(wisdom) prevailed over his lack of formal training!

Thank you for reading this.

Bill McCarthy
